Dear Ms. Ferguson:

In my capacity as _____ of _____
(PeriAnesthesia Domain), I have reviewed the First Edition (2008) Standards for Practice as
published by the National Association of PeriAnesthesia Nurses of Canada. I have also asked my
Registered Nursing (*staff/colleagues/student body/educational group*) to review these Standards.

We find these standards to be very reasonable, clearly written and complete. They focus on all
aspects of the PeriAnesthesia Nurses' scope of practice, environment and competencies.

The standards clearly define the responsibility of the PeriAnesthesia Nurse to maintain current
knowledge and professional service to the perianesthesia client/patient. The standards for functions
of education, monitoring, coordinating, care planning, ongoing management, accountability and
transition through the Phases of PeriAnesthesia environment are very well documented.

As PeriAnesthesia Nurses, we play a major role in the preparation of the client/patient prior to, and
the delivery of safe and competent patient care following, all types and techniques of anesthesia,
analgesia and sedation through all perianesthesia phases. Having national standards and
certification will improve recruitment of Registered Nurses into this specialized area of nursing, and
will promote the highest level of standards of care.

My (*staff/colleagues/student body/educational group*) and I endorse these standards as written. We
will accept these standards as a refection of our current perianesthesia nursing practice and support
them becoming our national standards. Please see table below for names, email addresses and
signatures of those that endorse these Standards.
